DETAILED ACTION

Allowable Subject Matter

2. Claims 1-50 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding claims 1,20,39, The prior art of record considered alone or in combination neither anticipates nor renders obvious a method of a transmitter that transmits from a common antenna at a plurality of radio frequencies, a plurality of radio channel frequency signals that are modulated with respective information modulation.

The prior art of record provided numerous teachings of transmitter that transmits from a common antenna at a plurality of radio frequencies. However, the prior art of record failed to specifically disclose a plurality of radio channel frequency signals that are modulated with respective information modulation, the transmitter comprising, a plurality of modulators at least one constant amplitude phase modulated drive signal a respective one of which corresponds to a respective one of the plurality of radio channel frequencies each modulator generating at least one modulated drive signal at the corresponding radio channel frequency from the respective information modulation such that the at least one modulated drive signal corresponds to the information modulation for the corresponding radio frequency , a coupling network that connects the outputs of the power amplifiers in series to produce a combined signal that is applied to the common antenna ,such that the common antenna radiates the plurality of radio channel frequency signals that are modulated with the respective information modulation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
